Description

Thanks to the multiple active ingredients contained, the hyaluronic acid facial gel serum helps to plump and define the contour of the face. Hyaluronic acid, highly hydrating, makes the skin appear relaxed and toned. It contains Porphyridium Cruentum microalgae, anti-wrinkle peptide and argireline peptide which have a strong anti-aging, firming, restructuring action; they reduce expression lines on the face, especially around the forehead and eyes. Quinoa seeds have a film-forming and tensor effect. It contains a draining peptide, which reduces bags under the eyes and has a decongestant effect, increasing the elasticity and brightness of the skin.

The Hamamelis phytoextract has a soothing and refreshing action. Vegetable glycerin helps maintain the external barrier and prevents dryness and flaking. It also contains blueberry, cucumber and ginkgo biloba berries from organic crops cold-extracted with innovative technologies without the use of solvents which have a soothing, protective, refreshing and antioxidant action.
